Date of Birth:	Sex:	Color:
Purchase Price:	Deposit:	Balance:
Sire:	Dam:	Est. Delivery:

To the best of my knowledge, this puppy is in good health at the time of delivery. Buyer has three working days to have the puppy checked by a licensed veterinarian. **Failing to do so will void your health guarantee.** If the veterinarian discovers the puppy to be unsound, it can be returned within the three day period for a refund of the purchase price or replaced with a puppy of equal or greater value at the breeder's discretion. This is provided the puppy is returned with a letter from the examining veterinarian stating in what respect the puppy is unsound. **No refunds after the three day warranty period.** The breeder will only act upon validated reasons of health to initiate a refund.

Retained testicles and hernias are excluded from this guarantee. The buyer must contact the breeder immediately upon discovery of an illness or defect. Any delay in doing so, voids this guarantee. The breeder at this time has the right to have the puppy examined by her veterinarian.

No warranty or guarantee is made to the disposition, life-span, size, color, show quality, working ethics, or **breeding** quality of any puppy. Breeder will not be liable for any expenses including but not limited to any veterinary bills or other expenses once possession has transpired.

No refund or replacement will be made on a deceased puppy until a necropsy is performed to determine cause of death. Such necropsy must be performed by an accredited institution set up for such procedures such as Utah State University. **A necropsy performed by a local veterinarian will not be accepted.** All expenses will be paid by the owner of the pup. The necropsy will accompany any request for replacement or refund.

No guarantee is given for any kind of worm, coccidiosis, or giardia. These parasites are all too common to pups and can be contracted from your water, soil or boarding facility. Your puppy has been wormed frequently from two weeks of age until your possession. It is your responsibility to continue to worm your puppy and check for parasites. Your pup should be wormed every two weeks until it is placed on a monthly heartworm preventative (Required). Internal flea preventatives that contain pesticides, like Capstar, are not acceptable and will void your guarantee. Frontline, Advantage, Revolution, or Sentinel is recommended for flea prevention.

This guarantee is non-transferable. Please be conscientious about vaccinating your puppy properly. Over vaccinating can cause long term problems. Vaccination related deaths are not covered under this warranty. This puppy has been vaccinated for parainfluenza, parvovirus, hepatitis, and distemper and dewormed properly from birth.
